Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 14 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. In claims 14 and 15 the phrase "plasticizing amount" is indefinite.
4. In claim 14 the phrase "increasing the plasticity" is indefinite.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakurai et al (JP 07-173342 or 07-011074 or 06-306252).

The present invention recites a group of compounds of 1,2-dialkyl cyclohexanedicarboxylic acid esters with the dialkyl groups being defined in claims 12 and 13. Sakurai et al teach a cyclohexane structure as shown below:

Where, R₃₋₅ are hydrogen or other defined substituents, and R¹ and R² are 6-28C alkyl or alkenyl. Some examples of these compounds are diisononyl hexahydrophthalate, and didecyl hexahydrophthalate (STN abstract of JP 07-173342). These compounds are used for compositions having excellent low-temperature impact resistance, flexibility, and moldability.

Compounds are defined by their atoms and bonds and are not distinguished by the manner with which they are made.
